**PLATFORMS/SERVICES** Shopify, Alteryx, UIPath, Tableau, Bloomberg Terminal, WordPress

**OPERATING SYSTEMS:** Windows, Mac OS, Linux

## EXPERIENCE

---

### MARKET INFORMATION AND DATA ANALYTICS INTERN, PricewaterhouseCoopers

01/2019 – 08/2019

- Reduced up to six hours of effort and processing time by developing programs and bots to automatically inspect, clean, match and transform data.
- Worked closely with developers and business analysts to optimize database structures and stored procedures.
- Collaborated with development groups to create UI components and complete software testing for significant updates.

### TECH SPECIALIST, LJM Developments

07/2017 – 06/2018

- Served as leading web developer responsible for front-end design, bug fixing and security updates. Implemented processes that improved site speed, performance and SEO.
- Created new features and capabilities on sub company's eCommerce site using Sass and Ajax API.
- Produced full UI for sub company's loyalty mobile application from scratch.

## PROJECTS

---

### GOVERNOR CUOMO CODING CHALLENGE

03/2017

- Awarded 3rd place out of 370 students for creating an application on "making college possible".
- Designed web app Collegium with 4 other teammates using AngularJS and Node.js to serve as resource hub for incoming college students.
- Pitched project in front of Facebook's engineering director (Jeff Reynar) and Governor Cuomo.

### STAR EARLY COLLEGE HIGH SCHOOL

10/2017 – 12/2017

- Upgraded and resolved bugs in existing SQL database structure of STAR program Brooklyn College, using Linux OS.
- Utilized several JS and CSS frameworks (Bootstrap, AOS,...) to create a user-friendly interface to help staff members navigate and operate software efficiently.
